## Safety Information

### About Photosensitive Seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

**Immediately stop playing and consult a doctor** if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms - children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting farther from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

**Other Important Health and Safety Information** The Xbox Instruction Manual contains important safety and health information that you should read and understand before using this software.

### Avoid Damage to Your Television

**Do not use with certain televisions.** Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played safely on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played safely on your set.

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

## THE STORY

From his humble beginnings as a parts runner for local garages in southern California, to his present day status as the dominant figure on the west coast street racing scene, Trixz Lane has always been most comfortable behind the wheel. His fearless exploits and unique driving style have made his name known from coast to coast. And his reputation has grown to legendary status.

Now, that reputation is all he has, as each of his 35 prized vehicles have been stolen by a rival and hidden throughout Los Angeles just days before the biggest money street racing event to ever hit the west coast blacktop. If Trixz hopes to maintain his legendary status and to compete in the high-stakes event, he must locate, retrieve, and secure his stolen vehicles.

And so the rush is on and the races begin amidst a glittering Los Angeles backdrop, as highly skilled drivers from far and wide go head-to-head for control of the most elusive stakes imaginable - ownership of the streets of L.A.

## THE PLAYERS

### TRIKZ LANE

As a kid, growing up in California's central valley, Trixz Lane had a hard time following the rules. Intelligent and easily bored, Trixz would from time to time simply take off from the various foster homes into which he'd been placed since the age of four. The only problem was, whenever he took off, he did so in a "borrowed" car and a high-speed chase with the police would usually ensue. Trixz' penchant for fast driving and his love of cars eventually lead him to take a job in a local garage. It was there he became plugged in to the local street racing scene, a scene he would come to dominate with a fearless driving style unlike any previously seen. By his 21st birthday he was known up and down the entire west coast, his status had grown to legendary proportions, and Trixz Lane had become underground racing's first true superstar.

### TY MALIX

Ty Malix has been taking his cars to West Coast Customs for years. It was there he met Trixz, who at that time was working for Ryan's West Coast crew as a tuning expert. Although they were roughly the same age, Ty had more life experience and he took Trixz on as a protégé, challenging him to push himself and expand his horizons. Ty, a street-racing enthusiast, bankrolled Trixz in the early days of his racing career and they have been partners ever since.

### LIDELL REY

Lidell Rey is the charismatic owner of various successful ventures throughout Los Angeles. As he puts it, he is a "perpetual motion, money-making, nation-breaking machine." He is also highly competitive and deeply desirous of anything he does not possess. One thing he wishes to possess, yet has never attained, is street status; something he will attempt to achieve by destroying Trixz in an underhanded plan to claim the streets of L.A.'s underground racing scene as his own.

### CLAY REILLY

Clay grew up as an only child in Santa Monica. Both of his parents work in the entertainment industry - his mother a casting agent, his father a creative exec at a major studio. Clay dropped out of Santa Monica's Rubicon high school to pursue a career in modeling which his parents were only too happy to foot the bill for as it would take him to New York and get him three thousand miles away from them. Due to the fact that his left leg is 4 inches shorter than his right, Clay walks with a perceptible limp and was unable to get runway work in New York. He did, however, receive a smattering of print ads for a local department store in New Jersey.

## THE PLAYERS

### WEST COAST CUSTOMS CREW

Ryan, Big Dane, Mad Mike, Q, Ish & Alex:

Assisting Trixz in his endeavor to reclaim his wealth and prestige will be the crew at West Coast Customs. From its humble beginnings in the early 1990s, to the position of worldwide renown that it holds today, West Coast Customs has always been known for the highest quality work in automobile customization. Key to the company's success is its employees, each of whom brings to the shop floor an unmatched skill set in a particular area of expertise.

With Mad Mike working the electronics, Ish on the interiors, Alex on the rims and tires, Big Dane on accessories, and Q managing it all, West Coast Customs is the only shop to which Trixz takes his rides. Ryan, the owner of West Coast Customs, has known Trixz since Trixz' days working for him as a tuning expert. Through the years everyone at West Coast has come to think of Trixz as one of the family, and they will do everything in their power to see that he is well-equipped to reclaim what is rightly his.

### TWISTA

Twista is an entrepreneur from Chicago who possesses off the charts intelligence. He is master of all he undertakes, from athletics to finance and his skill as a driver is legendary. Driving at 120 m.p.h. relaxes him, because it is the only time that his physical movement comes close to matching the lightning quick speed at which his thoughts progress. "The faster I drive, the more clear things become. It's like a form of meditation," he says. "It's what I do to unwind." Lidell Rey will enlist the services of Twista to assist him in defeating Trixz at the series of underground races set for the summer.

### LANA DAVIS

Lana Davis was born and raised in a small town in New York where she lead a fairly sheltered life - attending ballet classes, acting in school plays, and working as a candy stripper at one of the several convalescent homes spread throughout the sleepy upstate county. However, despite the comfort of her immediate surroundings, Lana yearned for more. So at 17 she quit school and joined a dance troupe that toured Europe by van. The tour lasted six months and while Lana found the experience valuable, she knew she was not cut out for a life of hostel hopping, communal showers, and eating beans from a can. Lana wanted more. At the tour's completion she moved to L.A. and got job as a choreographer at Lidell Rey's Cobra Club for Homies. She has been dating Lidell for five months.

**Mission** - One of LA Rush's many mission objectives is given, and you'll need to complete the mission to win and make the next mission available.

**Roam** - It's just like it sounds. Choose a car and roam freely through the streets, getting accustomed to the available cars on the Car Selection screen.

**Lowrider** - You can participate in High Bounce and Standing Tall events against another car.

## MULTIPLAYER

This game mode lets you race a friend. You'll set up using the options listed above, and you'll then choose from available cars to hit the streets in an all-out grudge match. (See **The Garage**, pg. 12).

### Pimpin' Your Ride

Anytime you pull into West Coast Customs, you'll be offered an opportunity to Pimp your ride. Once you select **Yes** to confirm the cost, your car will pull into West Coast Customs, and then drive out Pimped. Each car has

## THE HUD

### 1. Available Cash

Your accumulated cash is displayed here.

### 2. Fugitive Meter

These stars illuminate when the law is on your tail. The more stars that illuminate, the more wanted you are.

### 3. City Map

This map displays the streets you're travelling. An arrow on-screen displays your location. Icons surround the map, designating the location of the available objectives (see pg. 9).

### 4. Dashboard Display

Your RPMs, Speed and Gear are displayed here. While using your manual transmission, shift in the yellow or red to keep the RPMs up and accelerate faster.

### 5. Nitro Meter

When you use your Nitro, this meter displays the amount of nitro you have remaining.

## THE GPS

## GPS

LA is a big city, so you're going to need some help to get around. At the Map Screen (see pg. 8), move the **Crosshairs** over a location on the map, then press the **A** button to mark the location where you want to drive. The GPS will mark the location for you.

### 1. GPS Arrow

When you return to the game after marking your location, the GPS Arrow will be displayed, giving you the location and distance of the area you marked.

### 2. GPS Map Display

When using the GPS, the GPS Map Display will take the place of the standard Map to help guide you to the location.

# RACING / STUNT MODE

## 1. Guide Arrow

As you race, this arrow will help guide you toward race checkpoints that are visible in the skyline.

## 2. Nitro

In all race modes, Nitro is scattered throughout the course. Run over the icon with your car to pick it up, then choose the right moment to hit the **A** button and engage the nitro. Straight-aways are your best bet.

## 3. Checkpoints

These are very high and very visible from long distances. Chances are you'll be traveling at such a high rate of speed that you'll need to use these Checkpoints and the Guide Arrow to have a chance in the race.

## Stunt Mode

Green **Stunt Mode Icons** are scattered throughout the city. Drive over one to enter Stunt Mode. A timer will appear in the upper right portion of the screen. You'll need to run over a series of blue icons. Each time you run over a blue icon, more time will be added to the timer. If you beat the course, you can unlock a car.
